21 July 2025

Dear Subject Matter Expert / Stakeholder

Invitation to attend Scoping and Profiling occupational qualifications

The LGSETA had been approved by the QCTO to realign the following historically registered pre-2009 qualifications: **National Certificate: Emergency Services Supervision Fire and Rescue Operations – NQF 5** and **packaging of legacy Unit Standards** to Occupational qualifications as outlined in the ministerial determination.

These qualifications are integral to the core functions of municipalities and require knowledgeable and skilled individuals to ensure effective service delivery. Furthermore, LGSETA continues to experience strong learner uptake on this legacy qualification and their associated unit standards, which are planned for realignment into skills programmes.

The LGSETA would like to invite relevant subject matter experts (SMEs) in the fire industry and interested stakeholders to the scoping and profiling of the occupational qualifications as scheduled below:

Date : 12 August 2025 (Tuesday)
Time : 09:00 to 16:00
Venue : Virtual (teams meeting)

Kindly share this invitation broadly with other organisations and SMEs who may have an interest in the development of these occupational qualifications—particularly officials from the Chief Fire Officer's Office, and other relevant municipal departments.

Please confirm your attendance by accepting the meeting invitation in the system.

Kind regards

Albert Sekhwela
LGSETA ETQA Practitioner
